AZUL GRISEL RAMIREZ KURI

Software Engineer | Frontend & Product Engineering

Mexico City, Mexico | Portfolio | GitHub | LinkedIn | Email

PROFESSIONAL SUMMARY

Software Engineer experienced in React-based enterprise delivery, production application support, and independently shipping a native iOS product to the App Store. Work spans frontend development, mobile product engineering, release validation, and troubleshooting with distributed, English-speaking teams.

PROFESSIONAL EXPERIENCE

Infosys | Systems Engineer | Jan 2025–Present | Mexico City, Mexico

Production Engineering & Application Support — Healthcare sector | May 2026–Present

- Support business-critical applications and Windows Server environments; execute and validate in-place upgrades with continuity requirements.
- Investigate middleware, SFTP and application dependencies; identified a missing .NET 3.5 dependency causing a post-upgrade failure.
- Assess background executables and Windows service behavior for processes that must run independently of user sessions.

Frontend Engineering — Energy sector | 2025–2026

- Developed React features and fixed defects in Agile cycles, contributing through QA, UAT, release preparation and production deployment.
- Collaborated remotely in English with cross-functional engineering and business teams.

Xolotl Creative Labs | Junior Software Developer | 2024

- Built Android marketplace features in Kotlin and Java, including authentication, product catalog, cart and REST API integration.

SELECTED PRODUCTS & PROJECTS

CloseCut | Creator & Software Engineer | 2026–Present | App Store

- Designed, developed and launched a native iOS movie and TV journal using SwiftUI, SwiftData and Firebase; own product design, architecture, release and iteration.
- Built local-first persistence, synchronization and sharing; investigated deletion and stale-state bugs. Android version in development.

HoneyRoute | Apiary Intelligence PWA | 2025 | GitHub

- Built an AI-enabled React/Node.js PWA for hive-health monitoring and decision support; 2nd Place, HDC Brasil 2025.

EcoVentus | UAV Monitoring Platform | 2024 | GitHub

- Developed a React-based UAV mission-planning and environmental monitoring experience; 2nd Place, HDC México 2024.

TECHNICAL SKILLS

Frontend: React, Next.js, TypeScript, JavaScript, HTML, CSS | **Mobile:** Swift, SwiftUI, SwiftData, Kotlin, Jetpack Compose

Backend & Data: Node.js, REST APIs, Firebase, SQL fundamentals | **Cloud & Systems:** AWS, Windows Server, SFTP

Engineering: Git, testing, debugging, Agile/Scrum, release processes, production troubleshooting

EDUCATION

B.S. in Software Engineering | Universidad Politécnica de Pachuca, Mexico | 2021–2024 | GPA: 9.2/10

CERTIFICATIONS & RECOGNITION

Credly profile — verified credentials

Claude Certified Associate – Foundations | AWS Certified Cloud Practitioner

Meta iOS Developer | Meta Front-End Developer

Meta Android Developer | Google IT Support

Additional recognition: UK AI Agent Hackathon (Top 15) | Intel Guadalajara (Top 10)

Languages: Spanish (native) | English (C1 / professional working proficiency)
