

AZUL GRISEL RAMIREZ KURI

Software Engineer | Product Engineering | React | TypeScript | Next.js | Mobile | AWS

Mexico City, Mexico | azulrk.com | GitHub: AzulRK22 | LinkedIn: Azul Grisel Ramirez Kuri | azula2000@hotmail.com

SUMMARY

Software Engineer with experience building and shipping user-facing products across web and mobile, with a strong frontend foundation in React, TypeScript, and Next.js. Experienced in enterprise delivery, production troubleshooting, and independently taking products from definition and implementation through testing and release. Creator of CloseCut, a native iOS product shipped to the App Store, with experience working in English across international energy and healthcare environments.

EXPERIENCE

Infosys - Systems Engineer	Jan 2025 - Present Mexico City, Mexico
Alcon - Production Engineering / Application Support	May 2026 - Present
- Support enterprise applications and infrastructure in production environments with operational continuity and 24/7 availability requirements. - Execute and validate Windows Server in-place upgrades; troubleshoot application dependencies, middleware, SFTP behavior, and post-migration issues. - Diagnosed a post-upgrade application failure caused by a missing .NET 3.5 dependency and restored expected behavior. - Investigated background executables and Windows service behavior for processes required to remain available independently of interactive user sessions.	
NextEra Energy - Frontend Engineering	2025 - 2026
- Developed and maintained React functionality and defect fixes in two-week Agile delivery cycles for a U.S. energy-sector enterprise client. - Contributed across development, QA, UAT, release preparation, and production deployment while collaborating remotely in English with cross-functional teams.	
Xolotl Creative Labs - Junior Software Developer	2024
Developed Android marketplace functionality using Kotlin and Java, including authentication, product catalog, shopping cart, and REST API integrations.	

SELECTED PRODUCT EXPERIENCE

CloseCut - Creator & Software Engineer	2026 - Present Independent Product
- Designed, built, and shipped a native iOS product from product definition and UX through TestFlight and App Store release using SwiftUI, SwiftData, and Firebase. - Engineered local-first persistence, cloud synchronization, search, shared experiences, recommendations, accessibility, and localization. - Diagnosed beta and production issues involving synchronization, stale state, deletion reconciliation, and data consistency through real-device testing and production debugging. - Own architecture, implementation, App Store compliance, release management, and ongoing iteration; currently extending the product to Android with Kotlin and Jetpack Compose.	
HoneyRoute - Apiary Intelligence PWA	2025
Built an AI-powered React/Node.js PWA for hive-health monitoring and decision support; 2nd Place, HDC Brasil 2025.	
EcoVentus - UAV Monitoring Platform	2024
Developed a React-based UAV route analytics and environmental monitoring experience; 2nd Place, HDC Mexico 2024.	

EDUCATION

B.S. in Software Engineering - Universidad Politecnica de Pachuca, Mexico	2021 - 2024
--	--------------------

Official program: Ingeniería en Software | GPA: 9.2 / 10 | Professional examination/exemption: Feb 2025

TECHNICAL SKILLS

Frontend: React, Next.js, TypeScript, JavaScript, HTML, CSS | **Mobile:** Swift, SwiftUI, Kotlin, Jetpack Compose, Android | **Backend & Data:** Node.js, REST APIs, Firebase, SQL fundamentals | **Cloud & Systems:** AWS, Windows Server, SFTP, production troubleshooting | **Engineering:** Git, OOP, Data Structures, Design Patterns, Agile/Scrum, debugging, release lifecycle | **Languages:** Spanish (Native), English (C1 / Professional Working Proficiency)

CERTIFICATIONS & RECOGNITION

AWS Certified Cloud Practitioner | Meta iOS Developer | Meta Android Developer | Meta Front-End Developer | Google IT Support
Selected recognition: 2nd Place HDC Mexico 2024 | 2nd Place HDC Brasil 2025 | UK AI Agent Hackathon Top 15 | Intel Guadalajara Top 10
